

Professional Biography

Jacques Marais

B.Sc., FIA
Life Actuary

EXPERIENCE

Jacques has over 11 years' experience of working as a life insurance actuary in United Kingdom and Europe.

Jacques has extensive knowledge and experience of actuarial modeling using Prophet, MoSes, VBa and other languages like VB and QBasic. He has worked on specifications, documentation, development, testing, validation, model changes and analysis of results on many different reporting bases. He has therefore been involved and managed all parts of typical actuarial modeling processes, including communication of results to management and other stakeholders.

Jacques has extensive experience and knowledge across many reporting bases, including FSA statutory requirements, EEV, MCEV, ICA, RBS, IFRS, US GAAP and Solvency II (full internal and standard model). He has also dealt with asset analysis, data cleansing and processing. He is familiar with, and has been involved in, the actuarial reporting procedures of many direct and reinsurance companies.

Jacques has a good technical knowledge of stochastic processes and results, including market and liabilities. This also includes knowledge of the actuarial control cycle and systems.
